Toxin Free **LIVING**

Toxin Free LIVING

2 major sources of toxins we're exposed to:

HOUSEHOLD PRODUCTS

PERSONAL CARE PRODUCTS

While some companies make products that are safe to eat, other companies choose to use known human carcinogens or developmental toxins like coal tar and lead acetate. When risky chemicals are used in cosmetics, the stakes are high. These are not trace contaminants like those found at part-per-million or even part-per-billion levels in food and water. These are the base ingredients of the product, just as flour is an ingredient in bread. These chemicals are found in percent levels in personal care products, nearly all easily penetrate the skin, and some we ingest directly from our lips or hands.
